ATTRACTOR FIELD TECHNIQUE

- INTRODUCTION -

In our ancient past mankind was graced by God with the keys to our health and well being. The form this blessing took was the knowledge of the [Acupuncture Meridians](#) detailing the flow of [life energy](#) within our beings.

Through centuries of study man has only scratched the surface in his understanding of this marvelous gift. The time for more blessings has arrived. Below are detailed instructions which will allow man to free himself from the crippling effects of the addictions as well as emotional and physical ailments.

ATTRACTOR FIELD TECHNIQUE (AFT) is an independent outgrowth of the seminal work of David R. Hawkins, MD, Ph.D., author of "Power Vs Force: The Hidden Determinants of Human Behavior". In this work, Hawkins presents the results of 25 years of historic research into human consciousness, and provides a wake up call to humanity. In his preface, Hawkins states: "We think that we live by forces we control, but in fact we are governed by power from unrevealed sources, power over which we have no control."

Hawkins' book, and video tapes provide the background necessary to begin to understand [attractor fields](#), and their influence in our lives. The universe does not work in the ways that we have been taught. It is time to awaken and to learn the truth.

Dr. Hawkins embraces Rupert Sheldrake's concept of "M-fields", invisible energy organization patterns which establish the form of various levels of life. Like gravity and magnetic fields, which cannot be seen, these energy forces shape not only our physical beings, but our [mental state/context](#) as well. It is these unseen forces that are at the source for the scientifically unexplainable, such as cellular differentiation. This process cannot be explained genetically, since every cell has the same genetic information. How does one cell become brain tissue, and the other part of your big toe? Genes are not what science claims: they do not hold the [keys to health](#).

The finding of genetic abnormalities in various "hereditary" disorders is a coincidental occurrence caused by an unseen, and therefore overlooked, attractor field. Similarly, nowhere in the genes can be found the source for the startling psychological and behavioral similarities of twins that have been raised apart since infancy. How can genes possibly predetermine which brand of cologne will be chosen, or clothing taste?

Our scientific technology has failed to live up to its promise of a better world and a better quality of life. We need a [new paradigm](#), one that promotes independence and self sufficiency, rather than fear, despair, apathy, and poverty. We have been misled since the time of Newton. We have all accepted the mistaken idea that cause can be found in the material universe. We have focused our energies for centuries on drawing finer and finer distinctions within the material universe in our quest for the truth. *We have been looking in the wrong place.*

Drawing on Dr. Hawkins' original findings and methodology, meridian energy altering formulas have been developed which allow for the elimination of the energy fields which are at the source of Man's mental and physical disorders. For the first time in Man's history, we have the tools at our disposal to keep at bay the unseen forces that rule our existence.

AFT physical treatments work as specified in their instructions removing both the symptoms of disease and the energy field responsible for the particular disorder. Depending on life style choices, ongoing belief structures, values, etc., any disease energy field may be acquired, or reacquired across time. Daily use of LoC formulas for an extended period of time remains the only method of insuring freedom from these unseen forces. The LoC formulas also find value in psychotherapy and personal advancements in consciousness.

If you have no need for any of these techniques you are a very rare and fortunate individual. You are encouraged to share what you have found with someone who is less fortunate as they are in the vast majority.

A response form (Treatment Survey) requesting information on treatment success is included in this web site. Success rates from this feedback on the various treatments will be included in future updates of this site. This web site will serve as a "living laboratory", free from the influence of those special interests who have monetary investment in the future direction of health care. Knowing the results obtained from those who use these treatments is a vital part of the process.

-TREATMENT DIRECTIONS-

AFT treatments are specific techniques for interrupting the energy flow through the Meridians used by acupuncturists. There are no needles, and no discomfort at all. There is nothing at all to buy. These treatments must be carried out exactly. *Nothing* should be added nor omitted: the formulas are perfect exactly as they are presented. They are not painful, complex, nor distressing in any way. The effect they have is equally gentle.

Casual clothing may be worn during treatments, however bulky coats or sweaters and eyeglasses should be removed. Treatment points exist in the same locations on either hand or side of the head and body, and may be used interchangeably.

While one person can work alone, two people are recommended. This may take the form of one person reading, and the other performing the specific tasks required. The "reader" should tell the person being treated the specific action which should be taken. This action will always involve *lightly* tapping an *exact* number of taps to a specific meridian location. If a "reader" reads the area that the person needing treatment should tap, they should indicate the number of taps to be applied. Thus, when the symbol OE appears in an indicated formula, they should say "Tap the outside of the eye 20 times"; if the symbol were BH they should say "Tap the back of the hand 75 times". The more preferred method is for one person to treat the other. This *is* the ultimate form of caring for your loved ones.

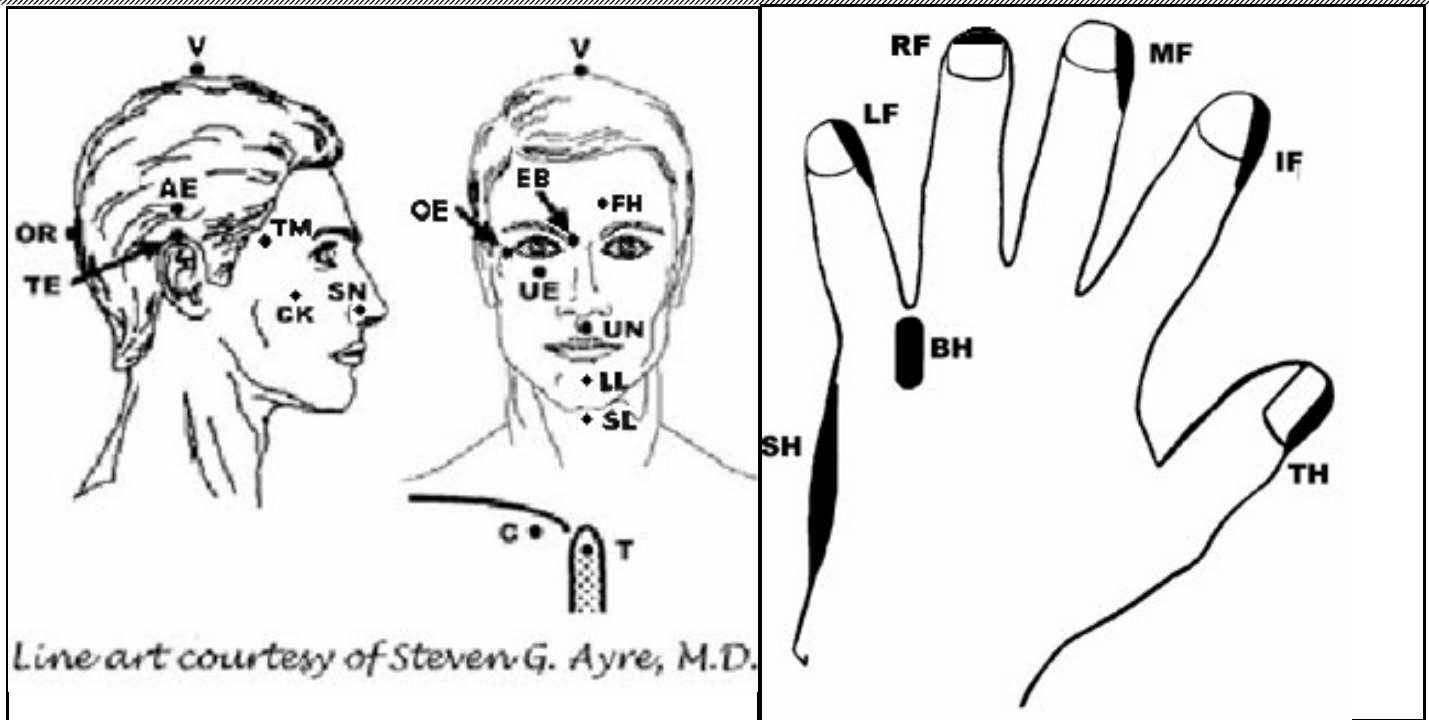

Treatment *timing is absolutely important!* Set a time that you can use to perform your treatment(s) which will be available every day. Do your treatment(s) within one hour of each other on consecutive days; there is a 2 hour window (Last treatment time plus or minus 1 hour) in which the treatment will work. If your treatments are weekly, perform them seven days later, within one hour of the previous treatment time. If the treatment time is missed you

must wait until the next day to continue your treatments. If you miss two days in a row, you should start the treatment process over again, just as if you had never begun.

The treatments work if you do them correctly, and *only* when you do them correctly. You must experience for yourself the gentle Power of AFT versus the force of science.

AFT Addiction Elimination Formulas

Perform these Formulas to break down the belief structures and their emotional basis which result in substance craving. Begin substance control by first using the addiction belief Formula for your particular addiction, and then performing the Habit Control and Withdrawal Formulas as needed. You only need to do the addiction belief Formulas once, unless you re-addict yourself by continuing substance use.

Remember: All meridian points require 20 taps except these: **BH, UN, and LL**

Instructions: Physical Ailment Formulas

The following formulas rid the body of the energy fields responsible for maintaining the listed physical conditions. Illness results from our thoughts becoming manifest. Our view of the universe is that the body and mind are isomorphic; they are different forms of the same thing. The body is just a reflection of the energy of our thoughts. Our experience shows that when the energy of our being shifts, physical matter, the physical body, follows. Because there are both conscious and unconscious thoughts that contribute to the development of illness we can not guarantee the success of our method any more than traditional medicine can. AFT is a method allowing you to change the inadvertent effect of your thought energy on your body. You will find this method different than any other health care alternative treatment system in existence. Our experience is that most are not disappointed with the results of our method. Rather, most people are amazed at the results they achieve with their own effort. There are no side effects to AFT treatments - they simply work, or they do not. All that is required is that you apply the formulas as specified.

The AFT approach to illness is completely different than that which is derived from science. Sages and quantum physicists agree that there is no "cause" within the physical world. We set the context of our being. If we do it well, not even the lightening bolts of the physical world will start a fire that the body itself cannot extinguish. Until we learn how to create a healthy context, AFT provides a method for putting out whatever fires may start.

General Directions:

Find the formula that applies to your individual condition. Formulas are listed alphabetically, and in simple groupings like "Eyesight problems", "Ear problems", "GI problems", "Joint Pain", "Skin Disorders", etc. If you cannot find your problem listed it is likely that your problem is covered by a more general formula. For example, you will not find "Athletes Foot" listed in this formulary since it is covered by the "Fungal & Yeast" infection formula.

The listed Formulas will rid the body of the energy fields responsible for the listed physical conditions and eliminate the symptoms that result from those energy fields. They should minimally be applied as specified.

For maximum effectiveness the formulas should be tapped in the following order: First the LoC Formulas then the physical formulas starting with the Energy Field Clearer followed by the Symptom Remover. We recommend that if you are tapping more than one formula at the same LoC level, that you tap the LoC formulas called for, then all of the physical formulas at that same LoC level immediately afterward. This saves the time required to re-tap the LoC formulas for each individual formula of the same LoC level.

It is important to remember that you cannot hurt yourself with the AFT formulas. Further, note that increasing the number of times you tap each meridian point during application will speed illness recovery. The number of times that each point should be tapped as shown in the Meridian Chart at the beginning of this manual is the minimum number of times necessary to correctly stimulate the meridian system. Instructions are provided below on exactly how you can increase the speed of symptom removal by increasing the number of times each meridian point is tapped when applying a formula.

If you do not obtain satisfactory results, check to make sure that you are applying the necessary Formulas correctly. Try other Formulas that apply to related conditions; you may not have the disorder you think (e.g., When you are sneezing, have a fever and runny nose, is it an Allergy, a Common cold, influenza, bronchitis, pneumonia, or some combination?). Have someone else apply the Formula(s) if you have a physical limitation or problem with correctly tapping.

To save time, as in a "pain emergency", and also as a quick check on the effectiveness of a formula for your symptoms, the treatment formula by itself for the disorder can be tapped without first tapping the LoC formulas that are listed in the bottom left hand corner of the box containing the formula.

Where to tap:

Tapping locations are specific meridian points, shown at the beginning of this manual. Until you become familiar with the tapping locations we suggest that you keep the chart open while you are tapping. All points are tapped a minimum of 20 times except BH (back of the hand, 75 taps), LL (lower lip, 5 taps) and UN (under nose, 5 taps). With the exception of the T (thymus), LL, and UN points you can tap on either side of the body interchangeably and obtain the same results. Tap the number of times specified as exactly as you can.

Description of Terms

Energy Field Clearer. These formulas provide a method to destabilize the specific energy disturbance that maintains a physical disorder and prevents the body from healing itself. Physical problems or ailments typically have two parts: a specific Energy Field and a separate Symptom Field. Most, but not all, physical problems use an Energy Field Clearer formula.

Symptom Remover. These formulas destabilize the specific energy patterns that underlie the specific symptoms associated with the disorder. Your symptoms may be pain, discomfort, or suffering of some kind. As a general rule the Energy Field Clearer and the Symptom Remover formulas should be tapped one right after one another .

LoC (Level of Consciousness) indicator. Located in the lower left hand corner of the box surrounding the Energy Field Clearer and Symptom Remover formulas, the LoC indicator is a number ranging from 20 through 175, and refers to consciousness levels, as explained by Dr. David Hawkins in his book "Power vs. Force"; these are various ways that we habitually experience and think about life. The LoC of a disorder is the context within which the disorder arises. The context does not "cause" the problem, but without the right context the disorder is not likely or cannot occur, so "normalizing" one's context is a necessary adjunct for healing to occur.

The LoC indicator is followed by a series of letter codes, like GV, LV, E, P, or K. There may be anywhere from one to five codes for any particular problem. These letter codes indicate the types thoughts, actions, and emotions that are nonphysical attractors of the disorder. Formulas to destabilize each of the specific aspects of conscious indicated are found on pages 39-44 of this manual.

Number codes: 1, 2, or 3. These codes refer to the optimum time that the formulas should be applied to derive the maximum benefit from tapping. These time designations relate to the Yin and Yang of disorders as defined by traditional Chinese Acupuncture. The optimum time of the day that the specific disorder can be most effectively neutralized is listed with each formula set. If tapped daily, applications should occur within ± 1 hr of the previous day's application for maximal effectiveness.

1 = Dawn to 12:00 o'clock Noon, or Sunset to 2:00AM

2 = Noon to Sunset, or 2:00AM to dawn

3 = Any time

Remember:

Perform your tapping about the same time each day plus or minus one hour. If your time of tapping is off by more than one hour for two days in a row, start counting the days you have tapped from zero, as if you had never started tapping in the first place. If you incorrectly tap a particular line, i.e. you tap the wrong spot or tap a point too few or too many times, re-tap the line, starting at the beginning of the formula, or after the last "C" point tapped.

ALSO REMEMBER: Formulas applied at any time *will work*; however, they will not be as effective in removing symptoms unless applied according to the above timing "rules".

VERY IMPORTANT:

To increase the effectiveness of symptom removal, increase the number of times you tap the meridian points as follows: (Repeatedly tapping a formula line only applies if you are tapping the minimum number of taps!)

Double tapping (increases effectiveness 10 times)

Tap the LL & UN points 10 times each

Tap the BH point 150 times

Tap all other points 40 times

Triple tapping (increases effectiveness 50 times)

Tap the LL & UN points 15 times each

Tap the BH point 225 times

Tap all other points 60 times each.

Take special note that double or triple tapping of the meridian points provides a much stronger meridian stimulation, and that if you double or triple tap there is no need to tap any formula line more than once, even if the standard published formula specifies "{repeat }" more than once.

Example:

The "standard" *minimum* formula below shows an Energy Field Clearer, a Symptom Remover and LoC 100 GodView and LifeView with a Time of Day of 1.

Anemia (Aplastic)	
Energy Field Clearer:	MF, BH, SH, MF, SH, LF, UE, V, FH, C {Repeat 3x}
Symptom Remover:	UE, V, FH, V, UE, MF, SH, LF, V, FH, LL, C {Repeat 6x}
LoC: 100 GV, LV 1	Apply both formulas daily for 2 months.

To use the Double or Triple tap method simply follow the rules above for each meridian location shown and *disregard* the {repeat xx} at the end of any line for any formula. So, for the Anemia Energy Field Clearer MF = 20 taps standard, 40 taps Double, 60 Taps Triple and so on for each other meridian location. (Remember BH, LL, UN are different - see above)

If you are working with a physical illness other than a pain disorder, remember that it will take time for the body to change after the formulas are completed, i.e., fungal infected nails will have to grow out, they will not be magically transformed by the formulas; the biochemical derangement's of organic mental disorders take months to resolve after a formula is completed, etc. While the cause for illness is NOT in the physical domain, the illness itself IS in the physical domain: it does take time for a disorder to change the body, and it takes time for the body to change back after the illness is gone.

Do not stop medications without your physician's advice.

If your symptoms still persist following formula application according to these instructions it is most likely that you are still actively generating the energy field responsible for the disorder with your thoughts, beliefs and/or values. Complete symptom remission requires changing what you believe. This often requires the use of a specific belief change methodology, a very practical alternative is to continue using the formulas as indicated above and Pray to God, as you know God, for intercession. Before starting to tap, the person being treated should say "In the Name of God, lift this affliction". If someone else is assisting by reading or tapping another, the assistant should speak along with the person they are helping, saying "In the name of God" at the same time.

If you find nothing for your particular disorder, or you are interested in the Belief Change technology, please contact the Foundation Headquarters via e-mail (ebert@comcast.net)

Another technology developed by the Foundation, beyond the tapping formulas provided freely to all, is the Accutone CD technology. Accutones employ specific frequencies to stimulate acupuncture points in lieu of using manual tapping. Accutone CDs work as effectively as tapping, however offer ease of application, guaranteed accuracy of formula application, and the possibility of continuous 24/7 treatment for chronic or life threatening disorders.

Levels Of Consciousness Formulas

General Information

The LoC formulas Listed on the following pages are designed for the following tasks:

- 1) Neutralizing the Attractor Fields which open us to various physical ailments;
- 2) The reduction of emotional distress via the neutralization of specific attractor fields during psychological treatment; and,
- 3) Increasing the personal Level of Consciousness, or movement toward Salvation and Enlightenment.

1.) **Details:** When used to assist with the elimination of physical distress, all of the specific formulas at the same numeric value as noted with the physical illness should be performed immediately before applying the illness formulas. To ensure that you do not re-attract the same illness, or another at the same level, the specific LoC formulas at that level should be applied for approximately one year after your physical illness is gone. Make sure that all four formulas for a particular level, i.e., God-View, Life-View, Emotion, and Process are applied.

2.) **Details:** When used during psychological therapy, the formula(s) needed to surmount a particular problem should be obtained via kinesiologic (muscle) testing. The statement "The energy field underlying this patient's distress is at the 175..150..125..100.. etc. level." should be utilized for this purpose. If desired, the specific formula needed to reduce distress may be obtained via questions such as "This problem is in the patient's God-View, Life-View, etc. Once the level of consciousness of the problem is determined apply all of the formulas, God-View, Life-View, Emotion, and Process, or apply the specific formulas determined via kinesiologic testing. While there is no need for the patient to focus on their problem while being treated, it is useful if they do so. Apply the appropriate formula(s) on the patient 1-3 times. After application, check the SUDS level of the patient's distress. If there is not a satisfactory result, there is another energy field involved. The Miscellaneous Psychological formulas are useful for specific emotional reactions and tendencies. They are used in a manner similar to the LoC's, determining which formulas may be of benefit to the patient via kinesiologic testing.

3.) **Details:** When used for personal growth, each of the five sets of LoC formulas for a particular LoC level should be applied daily. Perform all five formulas at each LoC level from Shame through Neutrality. Each set of formulas is to be applied in turn for 90 days (3 months). Perform them in the order that they are listed: Emotions, Process, Life-View, God-View, and then Karma. Once you have completed a particular set, you will only need to reapply the formulas in that set once a week to keep yourself clear of the associated Attractor Fields. If you are particularly energetic, and committed, you can perform more than one set on a daily basis. It is possible to complete all of the LoC formulas in as little as three-six months. Some prefer to complete LoC levels 20-100 for three months, then LoC levels 125-250 during the next six months. The personal Level of Consciousness achieved across time is positive, participatory, and beneficial to society. It is what Hawkins calls the "gateway" to higher consciousness. (Please all the Foundation if you are interested in the Advanced Consciousness Series.)

NOTE: All psychological formulas may be used on an "as needed" basis when, or if, the emotion(s) involved return. This *may* occur during the first 3-6 months. The formulas, when used for this purpose, should be performed three times successively for each application. Wait no longer than 5 minutes between each successive treatment.
